

University of St. Augustine for Health Sciences Reentry Protocol Frequently Asked Questions

updated October 11, 2021

This Q&A includes general responses to frequently asked questions. For more specific answers and details regarding procedures, please reach out to reentry@usa.edu or contact your campus Human Resources representative (faculty and staff) or faculty advisor (students) directly.

VACCINATION

Q: Who is required to show proof of being fully vaccinated?

USAHS students, faculty (including lab assistants and contributing faculty) and staff who plan to access campus at any time for the 2021 Fall Term must be [fully vaccinated](#) (effective **October 1, 2021**), or they will be required to show evidence of a negative COVID-19 test taken within seven days prior to each campus entry. **Vendors and campus visitors** are required to follow the same protocol. Visitors are limited to maintenance, security, patients for academic and research activities, and prospective hires/students. Children under two years old will be exempt and allowed on campus only if participating in a pediatric lab activity.

Q: How does the University collect vaccine data?

Students, faculty, staff and visitors are asked to upload proof of being vaccinated via the Daily Health Screening form located at reentry.usa.edu. You will not need to provide this information again once documentation showing full vaccination has been received. Vaccination data is encrypted, will only be accessed by specialized personnel and may only be shared in aggregate form, such as the University-wide rates.

Q: Is the vaccination disclosure confidential? Who has access to this information?

Identifiable information for individuals will remain confidential and is available only to limited, specialized employees who manage our COVID-19 response and have had Health Insurance Portability and Accountability Act (HIPAA) compliance training. HIPAA protocols will be strictly upheld.

Q: What documentation will I have to upload to prove I have been vaccinated?

Accepted forms of documentation are the Centers for Disease Control and Prevention vaccination card provided by the vaccination site, electronic COVID-19 vaccine passports or a COVID-19 vaccination record from your medical provider.

Q: If I have already had COVID-19 and recovered, do I still need to get vaccinated?

Yes, we highly encourage all students, faculty and staff to get vaccinated. Experts don't yet know how long you are protected from getting sick again after recovery. If you prefer not to be vaccinated, you will then opt for the COVID-19 testing protocol.

Q: Where can I get vaccinated?

Visit vaccinefinder.org for a list of vaccine providers.

Q: Why should I get vaccinated?

Vaccination can protect you from getting ill and from spreading the COVID-19 virus to others. It will take all of us to stop the spread of COVID-19 in our community.

- [Benefits of Getting Vaccinated](#)
- [Preparing for Your COVID-19 Vaccination](#)

Q: What if I try to get vaccinated, but there are no available doses for me?

With eligibility opened nationwide and expanded vaccine availability, this should not be an issue. If you have difficulty getting a vaccination, you can show evidence of a negative COVID-19 test taken within seven days prior to each campus entry.

Q: What happens if I am not fully vaccinated?

Anyone who does not disclose that they have been fully vaccinated in documentation through the Daily Health Screening form located at reentry.usa.edu, and who accesses a USAHS campus will be required to show proof of a negative COVID-19 test taken within seven days prior to each campus entry. We take these protocols seriously and ask you to do so as well. Violations of University policies may result in student conduct or employee disciplinary proceedings.

Q: What does “fully vaccinated” mean?

People are considered fully vaccinated **two (2) weeks/14 days** after their second dose in a two-dose series, such as the Pfizer or Moderna vaccines **or two (2) weeks/14 days** after a single-dose vaccine, such as Johnson & Johnson’s Janssen vaccine. If you don’t meet these requirements, regardless of your age, you are NOT fully vaccinated. Reference [the CDC website](#) for more information.

COVID-19 TESTING

Q: Who is required to provide voluntary proof of vaccination or negative COVID-19 tests?

Anyone who accesses a USAHS campus must either submit proof of [full vaccination](#) for COVID-19 or show evidence of a negative COVID-19 test result administered (proof must include testing date) within the past seven days prior to each campus entry. Children under two years old will be exempt and allowed on campus only if participating in a pediatric lab activity.

Q: How do I calculate the seven-day window a COVID-19 test is valid for campus entry?

Negative test results from a specimen collected within the seven (7) days prior to the date of campus entry are valid. For example, an individual may access campus October 11 with a negative COVID-19 test result from a specimen collected October 4-11. However, an individual wanting to access campus October 11 who has a negative test result from October 3 or earlier will be required to submit another negative test result taken with seven days prior to campus entry in order to enter campus.

Q: When will I be asked to provide test results to enter campus?

Testing reporting began October 1, 2021.

Q: How do you collect test results data?

Students, faculty and staff upload proof of being fully vaccinated or having a negative COVID-19 test taken within seven days prior to each campus entry via the Daily Health Screening form located at reentry.usa.edu.

Q: What type of COVID-19 test is acceptable?

The COVID-19 test must be administered by a healthcare professional or a licensed pharmacist to ensure integrity of the sample and accurate interpretation of results. Tests must have either Emergency Use Authorization by the U.S. Food and Drug Administration or be operating per the Laboratory Developed Test requirements by the U.S. Centers for Medicare and Medicaid Services. USAHS does accept antigen COVID-19 tests. Antibody tests **do not** meet the requirements.

Q: Is an antibody blood test allowed in lieu of a negative COVID-19 test result for campus entry?

Antibody tests do not meet [testing requirements](#), as they do not diagnose or detect an active COVID-19 infection. Antibody tests look for antibodies in the immune system that indicate if an individual was historically infected by the virus that causes COVID-19. These antibodies can take several days or weeks to develop after you have an infection. Antibody tests cannot diagnose COVID-19 at the time of the test nor show that an individual does not have COVID-19. In addition to the [FDA](#), the [CDC](#) also does not recommend antibody tests.

Q: Where can I get a COVID-19 test?

COVID-19 tests are available at no cost nationwide at [health centers and select pharmacies](#). USAHS will not reimburse anyone for COVID-19 testing if the tester chooses to use a pay-for-testing site.

Q: Why aren't we asking everyone to get tested regularly regardless of vaccine status?

USAHS' reentry protocols approach is in line with government organizations, private businesses and other universities, which do not require regular testing for those who have been fully vaccinated. Our campus safety protocols do require anyone on campus, regardless of vaccination status, to complete the Daily Health Screening, wear masks and practice physical distancing when possible. As has been our practice, we will assess expert guidance for maintaining a safe and healthy campus environment and updating and revising our protocol as new information becomes available.

Q: Will we make tests available on campus?

At this time, we have no plans to offer testing on campus, as we do not have the ability or infrastructure to do so. We will explore options to help facilitate testing if the need arises, and if is feasible to do so. Find a testing location near you [on this site](#).

STUDENT ATTENDANCE POLICY

Q: If I do not clear campus reentry because I have been exposed to COVID-19 or have symptoms of COVID-19, is my absence from class excused?

Absence from class is **excused** if a student cannot enter campus due to illness or exposure to COVID-19. Faculty will work with students to cover missed material. Students will be subject to further screening by the contact tracing team to determine potential risk to the campus community.

Q: If I do not clear campus reentry because I do not meet the requirement of having a vaccine or providing proof of a negative test, is my absence from class excused?

Absence from class is **unexcused** if a student cannot enter campus due to noncompliance with the vaccination or testing requirement. All absences are subject to the attendance policy in the Student Catalog.

Q: What options do I have if I am not vaccinated/choose not to disclose my vaccination status, and I choose not to provide proof of negative COVID-19 tests?

Students who opt out of reentry requirements may take a Leave of Absence for the 2021 Fall Term, if eligible per the existing Leave of Absence policy in the USAHS Student Catalog/Handbook.

MASKS AND HEALTH PROTOCOLS

Q: If I am vaccinated, do I still have to wear a mask?

Yes. We expect that mask wearing will continue as long as there is sufficient risk of COVID-19 presence and spread in the community. While USAHS consults CDC, state and local health guidelines on masking, it is ultimately the prerogative of USAHS to maintain its mask policy on a University level.

Q: To what extent will the Daily Health Screening be enforced?

There will be no tolerance for noncompliance or for any individuals who falsify information on the form. Employees, vendors and visitors who fail to comply will be contacted by the University, and their supervisor and Human Resources will be notified. Students will be referred to the Professional Misconduct Committee.

CAMPUS OPERATIONS

Q: What COVID-19 prevention and containment strategies will USAHS continue?

The University of St. Augustine for Health Sciences will maintain its [Personal Protective Equipment policy](#), including the use of face masks while indoors and when entering/exiting campus. In addition, USAHS will continue hygiene protocols, including handwashing and cleaning.
