

University of St. Augustine for Health Sciences COVID-19 Vaccine Task Force

Guiding Principles and Resources

The University of St. Augustine for Health Sciences (USAHS) has set forth the following guiding principles regarding COVID-19 vaccines. Helpful resources are also included. For further information on USAHS reentry details and our Return to Campus Plan, please visit <https://www.usa.edu/return-to-campus/>. COVID-19 Policies and Forms can also be found on the [reentry website](#) or for employees on [myUSA>Campus Connection>Human Resources](#).

Guiding Principles

1. USAHS is not currently a distribution site for the COVID-19 vaccine; however, we are working on a plan to facilitate the availability of the vaccine on campus for students, faculty and staff. The COVID-19 vaccine is [widely available across the U.S.](#)
2. Any student or employee who can obtain a COVID-19 vaccine should take the opportunity to receive one and independently locate a vaccination site. There is no cost to obtain a vaccine.
3. Any employee scheduled to receive a COVID-19 vaccine during regular work hours and who has an official notification of a vaccine appointment is permitted and will be accommodated to use work time to receive the vaccine with prior notification to the employee's supervisor. Please give as much notice as possible.
4. Anyone accessing the campus for the 2021 Fall Term will be asked to provide voluntary disclosure of COVID-19 vaccination status.
5. To protect the learning environment in our facilities and mitigate teaching disruptions, **all USAHS students, faculty (including lab assistants and contributing faculty) and staff will be asked to voluntarily disclose and agree to provide documentation by Friday, October 1** that they have been fully vaccinated for COVID-19. Those who are **not fully vaccinated or do not wish to disclose their vaccination status** will be required to submit proof of a **negative COVID-19 test taken within seven days prior to each campus entry**. In other words, the COVID-19 testing date cannot be older than seven days from the date of entry.
6. **Vendors and allowable campus visitors** will be required to follow the same protocol as the students, faculty and staff.
7. Tests must have either Emergency Use Authorization by the U.S. Food and Drug Administration or be operating per the Laboratory Developed Test requirements by the

U.S. Centers for Medicare and Medicaid Services. This includes both PCR and Rapid Tests. In addition to FDA and Medicaid approval, the test must be administered by a healthcare professional or a licensed pharmacist.

8. Individuals may obtain [testing at no cost](#). USAHS will not reimburse anyone for COVID-19 testing if the tester chooses to use a pay-for-testing site.
9. Anyone entering any USAHS campus, including any student or employee who is vaccinated, must follow **all** current USAHS health and safety protocols and policies including, but not limited to, personal protective equipment (e.g., use of masks into and in all campus buildings), hand washing and hygiene. Following CDC recommendations, recipients of the COVID-19 vaccine will be held to the same quarantine guidelines currently established and in place.
10. Vaccinated high-risk employees continue to be considered high-risk unless otherwise stated by a medical professional via medical recertification.
11. Campus presence is not mandated for anyone in the high-risk category. Employees should complete the [High Risk Accommodation Form](#) and contact HR (HR@usa.edu) with questions.
12. Students required by their clinical site to have the COVID-19 vaccine must make every effort to obtain it. Any student who cannot obtain the COVID-19 vaccine might not be placed in their clinical rotation as a requirement of the clinical site. In that case, an attempt will be made to find an alternate clinical placement; however, if an alternate placement cannot be found, the student risks delay in completion of the student's program. In addition, any student who refuses to get the COVID-19 vaccine might be removed from their clinical site and risk delaying their graduation. Students required to obtain a COVID-19 vaccine will need to show evidence of receiving the complete COVID-19 vaccine series/dosage prior to beginning their clinical rotation.
