

UNIVERSITY of
ST. AUGUSTINE for
HEALTH SCIENCES

PHYSICAL THERAPY RESIDENCY AND FELLOWSHIP PROGRAMS

Clinical Orthopaedic Residency

Residents will become highly skilled practitioners with an increased ability to successfully treat patients with musculoskeletal conditions

Designed to help new clinicians advance their skills and knowledge base for the ABPTS OCS exam

Residents will learn evidence-based orthopaedic concepts, techniques, and how to apply those skills in the clinic

90% graduation rate*

100% OCS Board Pass rate**

* 10-year graduation rate (2010 – 2020) per USAHS internal data collection

** Based on USAHS graduates of the program who have taken the exam between 2010 – 2020

Orthopaedic Manual Physical Therapy Fellowship

Focused curriculum of clinical experiences designed to provide fellows-in-training with advanced expertise in the sub-specialty of Manual Therapy

Fellows-in-training participate in a mentored process of learning which advances clinical specialty skills

Fellowship graduates are trained for leadership positions, such as teaching orthopaedic manual therapy and undertaking clinical research

93% graduation rate*

100% of graduates have become AAOMPT Fellows**

* 10-year graduation rate (2010 – 2020) per USAHS internal data collection

** Based on all USAHS graduates of the program as of 2021

Why USAHS?

Flexibility

- Pursue your Fellowship or Residency at any qualified site in the USA. No need to move or relocate!
- Most courses are available and completed online. Residents must attend 3 skills labs at our St. Augustine campus. Seminars offered for Fellows-in-training throughout the US.
- Multiple starts during the year: January, May or September. Adjustable clinical hours – start your clinical hours when it's convenient for you.

Comprehensive

Participants can also earn academic credit toward an EdD degree from USAHS.

Differentiated

Fellows-in-training and Residents participate in unique mentoring sessions and didactic work with distinguished faculty and experts.
